## **LETTER OF INTEREST FOR USING THE SPACE AT 2 OG**

2 OG provides space for project realization for artistically, creatively and theoretically working people. The affordable spaces can be used for working and presenting projects. Furthermore initiatives can apply to use the project spaces for their own events.

2 OG aims at the orientation towards the topics city, society and future. We are interested in artistic and theoretical positions that deal with these topics in an experimental way or focus on their own context as well as current social-political discourses. Transgression in disciplines and experimentation are more important to us than established and "safe" positions.

A jury consisting of the administration of 2 OG and external characters from fields of art, culture and science inspect the project proposals for feasibility, relevance considering the guiding topics as well as their discursive potential for the public.

Procedures and conditions are to be discussed with us in the further process.

Name of the interested person/initiative:

Name of the project:
